What is a refugee?

A refugee is a person who has to leave their own country because of any kind of danger.

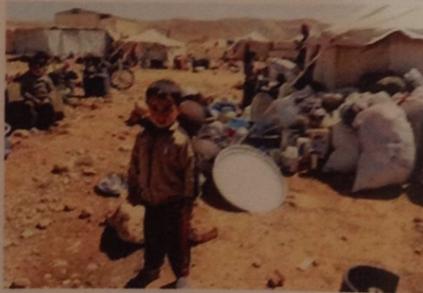

Reasons why people become refugees

Earthquake

Floods

War

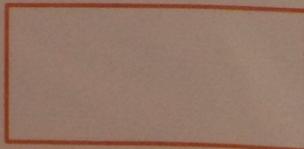

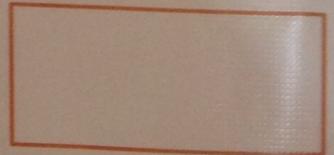

Volcano

Poor

Forest fires

famine

I can label

Match the refugee's situation to their picture

Flood

Earthquake

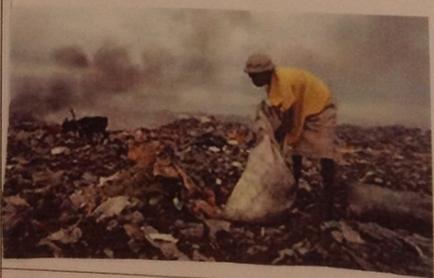

Volcanic Eruption

War

Famine

Poverty

I read a bit about
each of these.

Mummy told me about
the famine in
Ireland. It happened
because the potato
crop failed and
people were starving
and had no money
because they didn't
have potatoes to
sell.

Lots of people left
Ireland and went to
America by boat.

I read about Anne Frank on the internet. She wrote a diary during the war. It is now famous around the world.

Refugees from Syria

An estimated 9 million Syrians have fled their homes since the outbreak of civil war in March 2011, taking refuge in neighbouring countries or within Syria .

Men, women and children are forced to leave their beautiful homes. Some people are told to go and others just decide to go to keep their families safe.

Mummy and I looked at pictures from the newspapers and videos on you tube.

Some of these words are words that I've heard on the news and read.

Some are words that I imagine the people in the picture are feeling.

Ways That People Escape

ON FOOT

Thousands of people
walk 100's of miles.

Some people have to
carry their babies, others
push wheelchairs and
some need crutches.

These people do not have money for bus or train or boat tickets.

BOATS

It is very expensive to get a place on a boat. The owners charge a lot of money and they are not even safe. There can be hundreds of people on one boat at a time.

TRAINS AND BUSES

Trains and buses are always packed so lots of people do not get a space. They try to squeeze themselves on.
